

Please do not implement any new proposal that will diminish or lessen Indiana's current telephone privacy law. I used to receive up to at least 10 calls per month and since this law was passed I rarely receive any unwanted calls from telephone solicitors. I do not believe people should be bothered in their home unless they have specifically indicated that it is OK to do so. Please keep the current law intact so those of us who do not want unsolicited phone calls will not receive them. People who like to do their business via telephone solicitors can still do so by opting not to be on the Telephone Privacy List. Please keep democracy strong and allows individuals the freedom to choose. Keep Indianapolis's Telephone Privacy law as it is. Thank You.
